About

Frontend Developer with almost 3 years of experience building scalable web applications focused on performance and clean code.

Technologies

Languages & Frameworks: JavaScript (ES6+), TypeScript, React.js, Next.js, Node.js, Express.js

UI/UX & Styling: HTML, CSS, Tailwind CSS, MUI, Webflow, Shadcn, Responsive Design, SEO

State Management & Data: Redux, Zustand, REST APIs, Websockets, MongoDB

DevOps & Tools: Git, GitHub Actions, Docker, CI/CD, Azure Logs, kubectl

Experience

Software Development Engineer, Sigmoid Sept 2025 – Current

- Developed an interactive, **drag-and-drop planogram visualizer** using **React**, with an extensible architecture supporting diverse client requirements across **Walmart**, **Tesco**, and other retail organizations.
- Implemented **Role-Based Access Control (RBAC)** with **Azure AD Groups**, enabling granular feature access and secure authorization for users.
- Integrated **Microsoft Power BI** dashboards and optimized front-end performance using **React Query** and **virtualization** for efficient data fetching and rendering.
- Managed **PostgreSQL** databases using **pgAdmin**, including querying, data management, and database-level troubleshooting.

Software Development Engineer, Sudoviz Oct 2023 – Jul 2025

- Developed the **frontend for a security dashboard** automating vulnerability scanning, **Jira** integration, remediation workflows, and security reporting.
- Led frontend development of an **AI-driven repository Q&A system** using **React** and **MUI**, enabling interactive code discussions and vulnerability assessments.
- Rebuilt the company website using **Next.js**, improving load speed by **35%** and **SEO by 28%**, while managing the UI lifecycle from design to production.
- Collaborated with DevOps to deploy frontend applications using **Docker**, **GitHub Actions**, and **Azure Container Apps**; debugged APIs using **Azure Logs** and **kubectl**.

Contributions And Projects

Agentsman (Multi-Agent LLM System)

- Contributed frontend for an **AI-powered multi-agent system** enabling complex workflows through drag-and-drop UIs and auto-generated API endpoints.
- Integrated **RBAC** and tenant-specific workflow configurations for secure multi-user support.

CanvasHub (Realtime Whiteboard Sharing App)

- Developed a **real-time collaborative whiteboard** using the **MERN stack** and **Socket.IO**, enabling simultaneous drawing and chat through **bidirectional WebSocket communication**.

Education

B.Tech, DIT University, Dehradun

2016 – 2020
